(54) Title: METHOD OF PLAYING A MULTIMEDIA CONTENT TRANSMITTED BY A THIRD-PARTY ON A USER DEVICE

(57) Abstract: The invention relates to transmitting a multimedia content to a user device and playing said multimedia content on said user device during booting of said user device. Transmission is achieved by downloading or by streaming. The invention allows transmission of a start-up content (for instance a video logo or advertisement) from an operator, a content provider or a manufacturer to the user device. According to the invention such a start-up content is customized by the third-party and can be updated when needed. The start-up content is transmitted at a time when it does not disturb the user (during booting the user would be unable to use his device anyway).
